

Humanitarian Operations Protecting Elephants (H.O.P.E.)

Humanitarian Operations Protecting Elephants (H.O.P.E.) delivers world class solutions to challenges at the nexus of wildlife conservation and regional security. With a century of combined experience in wildlife management, military special operations and intelligence, global business ventures, non-profit governance and international relations, our senior leadership team is uniquely positioned to respond to the ongoing crises of elephant poaching on the African Continent. Working at the invitation of national governments and local partners, our solutions packages work to arrest the advance of poaching networks, stop the decline of elephant populations and bring a favorable resolution to conditions that undermine the security and stability of a host nation's natural resource economy. Services we provide include

Indigenous anti-poaching unit recruitment
Campaign and mission planning ·
Veterinary services ·
Fundraising ·

Multi-disciplinary anti-poaching unit training ·
Intelligence analysis
Rural medical care
Facilitation of sustainable economic development

With established relationships in 31 African nations, HOPE is able to leverage a mature socio-cultural understanding of the environments in which we operate. Our suite of capabilities allows partner governments and organizations to hand select a tailored program that fits within their goals and relevant parameters. To deliver success, HOPE follows the military special operations model of listening first and then integrating as an active partner into anti-poaching and wildlife conservation programs.

HOPE operates on both public and private funding, employing a low-overhead construct wherein 90% of all funds are directly applied to countering elephant poaching and the illicit trade in ivory. Your support is critical to accomplishing our mission and increasing the security of Africa's elephants and the prosperity of her people.
